NawTone® Masonry Stains

NawTone® stains are formulated such that they allow our Certified Stain Applicators to create a vast range of colors, giving you more options and providing for excellent color matches.

Get Inspired by Nawkaw's Mood Boards!

Not sure what color scheme to pick? Nawkaw has created a series of mood boards that will help you to get your imagination going! From earth tones to any color that makes you happy—there are no limitations to the colors we can provide for your home.

Historic Preservation

Nawkaw has been selected as the preferred provider for color correction on numerous high-profile projects, including the Margaret Mitchell House in Atlanta and Frank Lloyd Wright homes in Ohio, Pennsylvania, and Michigan. Because these projects will be seen by millions of visitors, having the colors corrected was of critical importance.

The Nawkaw Difference

Why Nawkaw? If you're thinking about changing the color of your brick home, you should know that Nawkaw is different. Just as a stain is different from paint, our Certified Stain Applicators are different from painters. It takes at least three years to become a Nawkaw Certified Stain Applicator. Knowledge, training, and experience are what sets us apart. We want you to love the new color of your home and add you to our long list of satisfied customers. of your home and
increase its value.

Our products and services
add a spectacular
look to your home.

Residential Services

Beautiful, natural looking color for brick,
block, concrete, mortar, stucco and stone.

Nawkaw®

We change the color of masonry and concrete!

For over thirty years, homeowners, architects, and the world's top designers have looked to Nawkaw to transform properties with beautiful colors and tones.

We manufacture our stain products and our specially trained teams apply them in order to precisely control the application process and ensure a natural looking appearance.

Need opaque color? NawTone®-K Opaque mineral silicate stains offer excellent hiding properties like paint, but with all color control and zero-maintenance benefits of stain.

Fall in love with your brick home again!

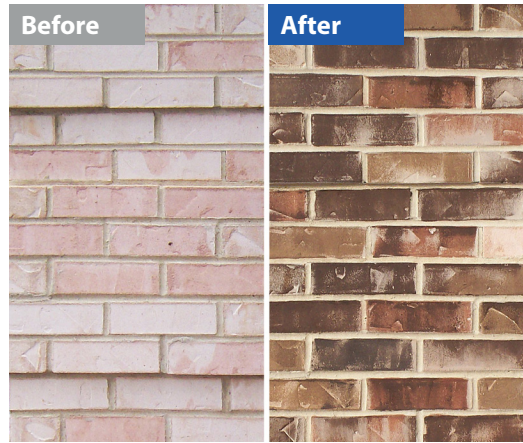

People build with brick because of its beauty, strength, and durability. Still, families grow, additions are made, and trends change—over time, your once beautiful brick home can appear dated. However, you don't have to settle for mismatched bricks or substitute building materials, when all you want is for your brick home to be the color you want with a natural look.

Complete Color Changes

Complete color changeovers are one of our most requested services. A fresh new color palette can add distinction and give your home the right curb appeal—plus dramatically increase its value!

The difference between Paint and Stains

"Paintenance"™

NawTone® stains are uniquely formulated for masonry and concrete. Unlike paint, which rests on top of the surface, our products penetrate and bond to masonry and concrete, forming an incredibly durable finish that won't chip, blister, or peel.

When paint traps moisture beneath the surface, it can lead to unsightly peeling and require multiple reapplications. This is what we call "Paintenance." NawTone® stains are a one-and-done finish. Our stains are custom blended, allowing for infinite color control on every project.
